EDUCATION

Academlo (Bootcamp)

Programador Full Stack (Back-end, Front-end)

March 2023

ALURA (Oracle)

Programador Back-end

April 2023

Universidad Especialidades Espiritu Santo

Engineering in Computer Science

MAIN PROJECTS

Ecommerce

February 2022

Web page of an Ecommerce, functions such as shopping cart, purchased products, login and logout.

Time it takes to develop it (2 days)

- Design and development of versions desktop and phone mobile, technologies you use React(JavaScript), Redux.;
- In frontend for the design was implemented CSS, SASS, BOOTSTRAP ;
- The app was tested by project leaders. It is 100% fully functional, you can create users and identify the cart with the unique products of each user.
- I demonstrate my skills in the basic principles of all developers (CRUD) Adding products to the cart, editing or deleting them.

Pokédex

February 2022

Application to choose your favorite pokemon. Demonstrating my abilities to consume APIs.

Time it takes to develop it (1 day)

- Filter buttons were developed using Redux technology from the React library, which increases the user's search facility by 70%.
- Use of the public pokemon API, in which my abilities to consume APIs and use them at convenience are demonstrated;
- In frontend for the responsive design, CSS, SASS, BOOTSTRAP were implemented;

Rick and Morty wiki

January 2022

Wikipedia of the famous Rick and Morty series, in which you can search for all the characters in the series, by planets, dimensions or character name. Development time (1 day)

- The web page was developed with the use of the public API of the series made with React.js.
- It has a keyword search engine similar to Google or YouTube search engines, which gives suggestions as you enter a word. (Programmed with basic and fundamental javaScript logic).
- Filtering engines streamline user search by up to 90%.

Barber shop

January 2022

Web page made for a barbershop, being a landing page for a final client.

Development time (3 hours)

- Landing Page developed in HTML5 CSS3 and Javascript;
- With the implementation of this landing page, the end customer will have a greater reach, improving the sales of their service by up to 40% (This and many more of my projects can be seen in my portfolio and in my GITHUB repository)

Teaching

Thanks to my soft skills I have been able to teach and help my co-workers and students.

- Knowing how to transmit my knowledge has helped my co-workers to improve their productivity in the areas in charge.
- I have helped more than 5 colleagues to carry out their projects by explaining to them in an easy and understandable way to achieve the goals of the deliverables on time.

WORK EXPERIENCE

Time To Dial

Madrid, Espana,
Enero 2023

Mobile Developer

Design and creation of advanced applications for the Android and iOS platform using:

- React.js
- react native
- CSS tailwind
- Work with external data sources and APIs
- Fix problems and improve application performance.

Guayaquil, Ecuador

Tech Mahindra

Project manager in administrative data

July 2019 - October 2020

- I was in charge of managing all the processes that had to be carried out during the day. Facilitating communication between company technicians and Engineers in charge of the Links area;
- I received emails and calls to mobilize technicians from our company when the signal from a base radio from the Claro company was failing in any part of the country;
- He knew how to support or allocate the requirements of the company's employees every time they needed an administrative solution.
- With my joining this company, productivity in my area increased by up to 20%. With which we came to win internal contests and monetary recognition.

Totem

monitoring operator

Guayaquil, Ecuador

September 2015 - July 2016

- Controller of security cameras for shrimp farms, under my charge I had 3 shrimp farms in different provinces of Ecuador. Each shrimp farm had a total of 5 main cameras and 12 secondary ones.
- I was in charge of sending formal emails representing the company to the client, indicating news that was presented every day.
- As security personnel we had to take an ICASI course in order to guarantee our services.
- I had to control, give orders and permits to the security personnel of each shrimp farm, with a total of 15 people. All communication with security personnel was done by code using a radio.
- During the period that I was working for the company, an infiltrator was captured who was trying to steal shrimp from one of the pools. Thanks to my work, the shrimp farm did not lose part of its production, for which my work was recognized monetarily.
- Before retiring I had to pass on my knowledge and be in charge of a group of 3 people so that they can start working in the company.

SKILLS

PROGRAMMING LANGUAGES

2 months: React Native
6 months: JavaScript,
5 months: React
4 months: Nodejs

TECHNOLOGIES

HTML, CSS, JQuery, Node.js, Express, SQL, MongoDB (NoSQL),
Git, Heroku, VirtualBox, React, React Native Redux, Sass, Bootstrap,
GitHub, Linux, Kali Linux.

ONLINE COURSES

Nodejs (Udemy, 2022), MongoDB(Udemy, 2022), Binance(Cursos gratis, 2019),
